IPATH'S PRODUCT COMMITMENT

IPATH has always been driven by its raw and creative outlook towards skateboarding and similarly progressive cultures. Just like the team that backs IPATH, our products have always been diverse in nature, adhering to no one cookie-cutter form. Since the beginning, IPATH has been constantly striving to make the best products possible while reducing our impact on the environment. Hemp, organic cotton and similar materials have always been a part of the IPATH program.

It's been more than 10 years since IPATH came on the scene and we're still pushing forward with products that get better season after season.

Within the last few years we've taken a long hard look at what we're doing, what our partners on the ground are saying and what our customers want to wear. We're using new factories and construction techniques to make some of the best footwear for this market.

As part of our ongoing commitment to our planet and your customers, here are a few ways we've stepped up our products.

HIGHER QUALITY AND DEPENDABLE DURABILITY

We've switched to an improved higher grade rubber to increase grip and reduce wear.

Green isn't a trend, it's a way of life for many and IPATH has been using high quality hemp in many of our shoes. Your customers may not be crunchy, but that doesn't mean they don't care about the environment.

Leathers and suedes have been greatly improved. Touch them. We're now getting these materials from Silver-rated tanneries - factories that produce high-quality leather goods in an eco-conscious manner. Few can claim that.

IMPROVED FIT

All the vulcanized shoes now use stroble construction, a process where the last of the shoe is stitched together to create a sock-like affect and allows for the addition of better insoles. They feel better and they perform better. People notice.

We've introduced EVA footbeds into all of our shoes, including the vulc models. This gives an improved fit and function for stresses that come with skateboarding, BMX and similar activities.

On select models, we've introduced the new More Cushion for the Pushing footbed. For guys that drop hammers... or just drop, this is going to be a big deal.

ENVIRONMENTAL COMMITMENT

All of our cupsole models use water based glues which are less harmful for the Earth's environment. You won't notice, but you should care.

All IPATH shoe boxes are made from post consumer paper and printed with soy based inks.

IPATH t-shirts and sweatshirts are made using organic cotton or recycled materials, such as those derived from PET bottles (the same plastic bottles from which you may drink soda or water).

This symbol denotes the use of hemp in this product. Hemp is a solid alternative to cotton canvas and other materials due to how easy it is to grow and its impact on the environment.

No animal byproducts were used in making this shoe when this icon is present.

An advanced footbed design that helps fight against the high impacts. Now you can have More Cushion For the Pushing. Available on select models.

On our core skate styles, we have added Sticky Icky rubber to the forefoot. This special formula allows for increased board grip and feel.

The Super Natural Collection

A limited release of select IPATH footwear. Featuring the Imprint outsole – a custom built sole that Vibram created specifically for skateboarding and is available exclusively on IPATH products -- the Super Natural collection adds premium performance to your shoe wall.

The Super Natural collection includes three new shoes, the Nite Owl (Jon Goemann's pro model), the Artisan (Steve Nesser's pro model) and the Adams, an outdoor inspired mid that like the Cat, is definitely skateable.

Also included in the Super Natural collection are select Grasshopper and Cat models, with added tweaks to make them more skate-friendly than ever.

Thin, light, flexible with no break-in period. That's Super Natural.

Look Back And Push Forward

Remember when we dropped the Cats? They changed what a skate shoe could be. If you carried them, you were stoked. The Cat looked unique. It was functional. It had a story. And most importantly, it sold.

Now we're redefining what a cupsole can be and doing it in a way that no other brand in this industry can. For Fall 2011, we're partnering with Vibram on their first custom sole built specifically for skateboarding. And IPATH is the only brand to have it.

If you don't know Vibram, they're the leader in high performance outsoles. For more than 70 years, Vibram has been combining the best in durability, comfort and performance to create rubber for shoes that matter. Vibram soles are found on premium outdoor footwear worldwide, including boots that make it to top of Everest, the feet of supermoto riders, on snowboard boots and the feet of elite military forces. When performance matters, Vibram is the answer.

About Imprint - The Super Natural Sole

While many companies have used stock Vibram products in action sports, Vibram created the Imprint sole specifically for skateboarding and it's available exclusively from IPATH. You won't find it anywhere else.

Utilizing a multi-durometer version of Vibram's TC1 Plus rubber compound, Imprint provides exceptional grip and durability in a light, thin profile, with no break in period.

The Imprint's heel area has been reinforced with a harder rubber to limit the excessive wear caused by heel stops. The toe and lateral sections were designed with a specific tread pattern that provides the right amount of grab and a directional flex in line with the natural movements of your feet. The Imprint's center areas are a combination of micro-lug surfaces and an omni-directional traction pattern for enhanced board feel and overall grip.

The result is a shoe that feels like a vulc, absorbs shock like a cupsole and performs like nothing else out there. Simply put, the Imprint sole lasts longer and skates better.

Available only on the IPATH Super Natural collection, including the Nite Owl, Artisan, Adams, as well as select Cat and Grasshopper models.

JON GOEMANN
FOR IPATH

NITE OWL / INSPIRED BY JON GOEMANN

When we announced Jon Goemann joining the crew late last year, the calls came in asking when he was going to get a shoe. This is it.

Part of the Super Natural collection, Jon's first pro-model features the Imprint outsole custom designed for us by Vibram. Looks like a chiller, feels like a vulc, style that lasts.

Also features our advanced More Cushion for the Pushing footbed.

NITE OWL

STEVE NESSER

FOR IPATH

ARTISAN / INSPIRED BY STEVE NESSER

The second IPATH pro shoe for skateboarding’s working man, Steve Nesser. Included in our Super Natural collection, the Artisan features the custom Imprint outsole by Vibram (an IPATH exclusive) and a solid, understated upper that matches Steve’s commitment to skateboarding.

Also features our advanced More Cushion for the Pushing footbed.

21E06
Peat Suede/Hemp

Fred Gall is the godfather for the lpath crew when we go on tour. With his legendary status of destroying less than perfect skate spots that others don't even want to touch, Fred continues to inspire the next generation of rippers.

Fred's low has a triple stitched, beefed up ollie area, a grippy vulc outsole, combined with toe and heel caps that make it able to deal with New Jersey's worst.

Also features our advanced More Cushion for the Pushing footbed.

MATT ROD CAT LOW

Another IPATH OG, M-Rod's legendary style comes through in this custom version of the Cat Low. Smooth laid back, and able to get the job done when the time comes... just like Matt.

The Cat Low features our advanced More Cushion for the Pushing footbed.

MATT ROD CAT LOW

WHARF

Following our commitment to following our own path in making footwear, the Wharf was introduced a few years back as a unique take on what a vulc could look like.

After being out of the line for a few seasons, we brought it back last year and with a few tweaks, it's found great success. New material stories and colors help keep it fresh.

WHARF

This is what put us on the map. If you stock it, it sells.

You don't want to mess too much with a classic. We did some slight retooling to keep it relevant to the new guys that weren't pushing 10 years ago. With a new, grippier outsole, minimal padding and colors that work at the park or in the office, the Cat should have at least another nine years added to its life.

The After Dark Oiled Nubuck is part of our upgraded Super Natural collection, featuring the Imprint outsole that was created exclusively for IPATH by Vibram.
